FORWARD - LOOKING STATEMENTS

This Red Herring Prospectus contains certain “forward-looking statements”. Similarly, statements that describe our strategies, objectives, plans or goals are also forward-looking statements. All forward-looking statements are subject to risks, uncertainties, expectations and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement. These forward-looking statements, whether made by us or a third party, are based on our current plans, estimates and expectations and actual results may differ materially from those suggested by such forward-looking statements.

Actual results may differ materially from those suggested by forward-looking statements due to risks or uncertainties associated with expectations relating to and including, regulatory changes pertaining to the industries in India in which we operate and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India which have an impact on its business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes and changes in competition in the industries in which we operate.

Certain important factors that could cause actual results to differ materially from our Company’s expectations include, but are not limited to, the following:

- If we are unable to anticipate and respond to changes in fashion trends and changing customer preferences in a timely and effective manner, the demand for our products may decline, which may have an adverse effect on our business, results of operations and prospects.
- We derive a significant portion of our revenues from sales to third party brand owners, wholesalers and through online retailers. Any failure to maintain relationships with such third parties could adversely affect our business, results of operations and financial condition.
- We are dependent on our contract manufacturers to procure our products and do not have any manufacturing facilities of our own. Our business is therefore dependent to a large extent on expected performance and operation of our contract manufacturer partners.
- If any new products or brands that we launch are not as successful as we anticipate, our business, results of operations and financial condition may be adversely affected.
- If we are unable to procure raw materials, finished products and packing material of the required quality and quantity, at competitive prices, our business, results of operations and financial condition may be adversely affected.

For further discussion of factors that could cause the actual results to differ from our estimates and expectations, see “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on Page Nos. 26, 107 and 198, respectively, of this Red Herring Prospectus. As a result, actual gains or losses could materially differ from those that have been estimated.

We cannot assure investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements as a guarantee of future performance.

Forward-looking statements reflect current views as on the date of this Red Herring Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, our Directors, the Promoters, the Syndicate nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

SECTION II - ISSUE DOCUMENT SUMMARY

The following is a general summary of the terms of the Issue. This summary should be read in conjunction with and is qualified in its entirety by, the more detailed information appearing elsewhere in this Red Herring Prospectus, including the sections entitled “*Risk Factors*”, “*Industry Overview*”, “*Outstanding Litigation and Material Developments*”, “*Our Promoters and Promoter Group*”, “*Financial Information*”, “*Objects of the Issue*”, “*Our Business*”, “*Issue Procedure*” and “*Description of Equity Shares and Terms of Articles of Association*” beginning on Page Nos. 26, 95, 209, 154, 160, 73, 107, 237 and 267, respectively of this Red Herring Prospectus.

1. Summary of Industry in which the Company is operating

The domestic apparel market can also be broadly divided by price into super premium, premium, medium, economy, and value segments. The medium price segment holds majority of the share among apparel segment followed by economy segment. The price sensitive rural population forms a major part of the value and economy price segments of apparel market. Further, driven by the twin trends of premiumisation and value consciousness, the mid-market segment is being squeezed on both sides by the value and the premium segments. Demand for various apparel categories varies substantially across the country. The urban metro market comprising cities such as Delhi NCR, Mumbai, Bengaluru, Chennai, etc., is the biggest market for apparel in India and contributes over 20% to the Indian apparel market. Considering that less than 20% of India’s population lives in these cities indicate the higher purchasing power in urban areas and frequency of purchases. The metros also witness huge penetration of women’s western wear as compared to Tier -I or Tier -II cities of the country. High real estate costs, competition among branded players and saturation in metro cities of the country have driven big brands to move towards the smaller cities. The increasing purchasing capacity and awareness of fashion and trend in small cities has also resulted in providing a huge market to the organised players of the country. The rural apparel market in India is still primarily catered by unbranded and unorganised local players. Need based clothing and price sensitivity among people of rural India does not make it a lucrative market for branded players.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. If we are unable to anticipate and respond to changes in fashion trends and changing customer preferences in a timely and effective manner, the demand for our products may decline, which may have an adverse effect on our business, results of operations and prospects.***

Our Company is engaged in the business of manufacturing and selling of menswear and men's garments under our own brand, through white-labelling, *i.e.*, for other brands such as, Landmark Group, V-Mart Retail, V2 Retail, Highlander, Cobb, Kontail, *etc.*, and through online e-commerce platforms. Our results of operations are dependent on our ability to anticipate, gauge and respond to changes in customer preferences and design of new products or modifying the fabrics we deal in by manufacturing the same on a job work basis through our contract manufacturers, in accordance with changes in fashion trends as well as customer demands and preferences. If we are unable to anticipate, gauge and respond to changing customer preferences or fashion trends, or if we are unable to adapt to such changes by modifying our suppliers and products on a timely basis, we may lose, or fail to attract customers, our inventory may become obsolete and we may be subject to pricing pressure to sell our inventory at a discount. A decline in demand for our products or a misjudgment on our part could lead to lower sales, excess inventories and higher markdowns, each of which may have an adverse effect on our results of operations and financial condition.

- 2. We derive a significant portion of our revenues from sales to third party brand owners, wholesalers and through online retailers. Any failure to maintain relationships with such third parties could adversely affect our business, results of operations and financial condition.***

Our Company is engaged in manufacturing and selling of menswear and men's garments under our own brand, through white-labelling, *i.e.*, for other brands such as, Landmark Group, V-Mart Retail, V2 Retail, Highlander, Cobb, Kontail, *etc.*, through wholesalers and through online e-commerce platforms. Our business operations are highly dependent on our customers, and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, if there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

Since, we are dependent upon third parties for majority of our revenue, we cannot assure you that such third parties shall fulfil their obligations under such agreements entirely, or at all, shall not breach certain terms of their arrangements with us, including with respect to payment obligations or quality standards, or shall not choose to terminate their arrangements with our Company. We do not have formal arrangements with our customers, therefore our ability to initiate litigation against them in respect of any breach is accordingly curtailed. In the event we file any litigation, such litigation could divert the attention of our management from our operations, and be decided against us, which may adversely affect our business, financial condition and results of operations.

- 3. We are dependent on our contract manufacturers to procure our products and do not have any manufacturing facilities of our own. Our business is therefore dependent to a large extent on expected performance and operation of our contract manufacturer partners.***

We currently do not own any manufacturing facilities and procure our products with our brand from various contract manufacturers which we distribute and sell. We are therefore dependent on third parties for the manufacturing of our products and maintenance of adequate inventory to ensure that we are able to procure products based on supply necessities. The operations of our contract manufacturers are subject to various operating risks, including some which are beyond their control, which may include breakdowns and failure of equipment, industrial accidents, employee unrest, severe weather conditions, natural disasters etc. We have not entered into any formal agreements with the contract manufacturers. We may be unable to replace our existing contract manufacturers at short notice, or at all, and may face delays in procurement and added costs as a result of the time required to develop new contract

manufacturers to undertake manufacturing in accordance with our standard processes and quality control standards. If our contract manufacturers are unable to expand their manufacturing capabilities or face stoppage of the manufacturing process, we may not be able to tap growth opportunities in the branded apparels market. While we endeavour to have back-up arrangements in place to ensure adequate capacity and sourcing, we cannot assure you that we will always be able to arrange for alternate manufacturing capacity, or alternate sources of our raw materials, at prices acceptable to us, or at all, or that we will be able to pass on any increase in cost to our customers.

Sourcing our apparel products from new contract manufacturers may have an adverse impact on the quality of our products which may in turn have an adverse impact on our results of operations. Any inability on our part to arrange for alternate contract manufacturers, on commercially acceptable terms, may have an adverse effect on our business, results of operations and financial condition. While we strive to ensure that our outsourced manufacturers meet stringent quality requirements, we cannot guarantee that the outsourced manufacturers will duly comply with all required processes to ensure the maintenance of quality standards. While we strictly inspect the products upon receipt at our warehouse, any lacunae in quality standards could adversely affect the reputation of our brands. We exercise regular supervision over the manufacturing operations at the facilities of our contract manufacturers through our personnel who are either stationed at such facilities or periodically visit these facilities for inspections, enabling us to efficiently carry out production changes in designs or quantity of products required.

We also face the risk of legal proceedings and product liability claims being brought against us by various entities including customers, franchisees, and online retailers, for defective products sold. We cannot assure that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. In the event that goods procured by us from external vendors or third-party manufacturers and sold to our customers suffer in quality or after sales service provided by them is unsatisfactory, our brand image and sales could be negatively impacted. Further, any damage or negative publicity in relation to the quality of our products may adversely affect our business and may lead to loss of reputation and revenue. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs. While our staff periodically visits and monitors the operations of our vendors, we do not control these vendors or their labour practices nor do we assess their labour practices, either during such visits or in determining sourcing allocations. The violation of or any suspected violation of, labour laws or other applicable regulations by our vendors, could have an adverse effect on our business and results of operations.

4. *If any new products or brands that we launch are not as successful as we anticipate, our business, results of operations and financial condition may be adversely affected.*

Through our brands, 'FTX', 'TRIBE' and 'Conteno', we continue to introduce a wide range of garments. To expand our product range and price spectrums, we intend to grow our three emerging brands, and may also launch additional brands. However, we cannot assure you that any new products or brands that we develop or launch will accurately reflect the prevailing fashion trends or be well received by our customers and the market, within the anticipated timeframe or at all, or that we will be able to recover costs incurred in developing these products and brands, or earn adequate profits and profit margins. If any of our brands, or the products and brands that we may launch in the future are not as successful in gaining market acceptance as we anticipate, our brand image and reputation may be affected, contrary to our projections or future growth expectations, which could adversely affect our business, results of operations and financial condition. Further, the launch of any new brands or any future expansion to our product offerings may place a strain on our management, operational and financial resources, as well as our information systems, which could also adversely affect our business.

5. *If we are unable to procure raw materials, finished products and packing material of the required quality and quantity, at competitive prices, our business, results of operations and financial condition may be adversely affected.*

We source our raw materials and fabric from the local markets and outsource its job work to the various contract manufacturers under the supervision of company personnel for designs and quality control. Our business operations require a sufficient and stable supply of raw materials and other goods. However, the amount of raw materials and other goods we require may fluctuate from time to time. We depend on third-party vendors for raw materials and goods used in the manufacture of our products. Our financial performance depends largely on our ability to arrange from the sellers of such materials in sufficient quantities at competitive prices. We are not assured of continued provision or adequate pricing of raw materials. Any of our contract manufacturers could discontinue or seek to alter their relationship with us. However, given the vast network of contract manufacturers, we may always be able to identify alternates both within and outside of the geographic locations.

6. *We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.*

Our Company is engaged in the business of manufacturing and selling of menswear and men's garments under our own brand, through white-labelling, *i.e.*, for other brands such as, Landmark Group, V-Mart Retail, V2 Retail, Highlander, Cobb, Kontail, *etc.*, and through online e-commerce platforms. We manufacture a particular garment, on job work basis, on the basis of orders which are received from our customers which generally contain the specifications as per which the garment has to be manufactured. We have not entered into any agreements, arrangement or any other understanding with our customers and therefore, our business is dependent upon the continuous relationship with the customers and the quality of our products. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing our products. If there occurs any change in the market conditions, fashion trends, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

7. *Any failure in the quality processes by our contract manufacturers may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of products supplied by our manufacturers does not meet our customers' expectations.*

Our products might have certain quality issues or undetected errors, due to defects in manufacture of products caused by our contract manufacturers. Any shortcoming in the products procured by us due to failure of the quality control procedures adopted by the contract manufacturers, negligence, human error or otherwise, may damage our products and result in deficient products. It is imperative for our contract manufacturers to meet the quality standards set by our customers and agencies as deviation from the same may cause them to reject our products and cause damage to our reputation, market standing and brand value. While, instances of quality lapses by our contract manufacturers have not occurred in the past, occurrence of any such events in the future, may have an adverse impact on our business, results of operations and financial condition.

In the event the quality of the products is sub-standard or the products procured by us suffer from defects and are returned by our customers due to quality complaints, we may be compelled to take back the sub-standard products and reimburse the cost paid by our customers. We do not have formal arrangements with our contract manufacturers, therefore we may not be able to claim a reimbursement of the damages suffered by us or litigate them for such reimbursement. Such quality lapses may strain our longstanding relationship with our domestic and international customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which may have a severe impact on our revenue and business operations. We along with our contract manufacturers also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs. While, no product liability claims have been instituted against our Company, however occurrence of any such events in the future, may have an adverse impact on our business, results of operations and financial condition.

8. *Our warehouse and a majority of our contract manufacturers are exclusively based in a single geographical region. This may expose our manufacturing processes and our supply chain to regional risks, which may adversely affect our business, financial condition and results of operations.*

Our warehouse and a majority of our contract manufacturers are exclusively based in a single geographical region in and around Kolkata, India, and we depend on our contract manufacturers for a significant portion of the manufacturing processes of our products. Our warehouse acts as a facility for storage and onward delivery of our merchandise across the country. The geographical concentration of our warehouse and our contract manufacturers renders our operations more susceptible to regional risks and any adverse changes and events occurring in or around the region. Adverse changes and events that may impact our operations may include disruptions to infrastructure and services (such as supplies, transportation and utilities for our facilities), significant natural disasters and man-made incidents, political agitations and workforce disruptions, as well as changes in the general economic conditions, the regulatory environment and local government policies. In particular, incidents of fire, damage to, or inability to access, our warehouse or manufacturing facilities of our contract manufacturers, or other issues preventing the normal operation of those facilities could hinder the manufacturing or distribution of our products. In such case, we may need to utilize alternative facilities to manufacture our products. However, we may not be able to do so in a timely manner, or at all. While we have not experienced any such disruptions in the past, we cannot assure you that we will be able to

effectively manage any potential losses arising from any such events, which may adversely affect our business, financial condition and results of operations.

9. *Our operations could be adversely affected by labour shortages, strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees*

Our operations and supply chain could be adversely affected by labour shortages, increased labour costs or work stoppages by our employees and those of our contract manufacturers and our suppliers. We believe that such personnel are critical to maintaining our competitive position. In the event of labour shortages, we, our contract manufacturers and our suppliers may have difficulties recruiting or retaining employees or may cause us to incur additional costs and result in delays or disruption to our production and sales. Any failure to attract qualified personnel at reasonable cost and in a timely manner could reduce our competitive advantages relative to our competitors and undermine our ability to expand. To sustain our operations and relations with our contract manufacturers, we may need to increase the wages paid to them, and as we do not maintain long-term contracts with our contract manufacturers, the price we pay for their services may increase due to increased labour costs incurred by them. If we are not able to pass on the increased labour costs to our customers, our business and results of operations may be adversely affected. Any labour unrest directed against us, our contract manufacturers and our suppliers could directly or indirectly prevent or hinder our normal operating activities (including at our warehouse) and we cannot assure you that any disruptions in work due to strikes, wage disputes or other problems with the work force will not arise in the future. Further, the imposition of new laws, rules and regulations in such area could also adversely affect our operations. These actions are very difficult for us to predict or control and any such event could adversely affect our business, results of operations and financial condition. While, there except for labour shortage in the ordinary course of business, there have not been any instances of labour shortages, strikes, work stoppages or increased wage demands by our employees, however occurrence of any such events in the future, may have an adverse impact on our business, results of operations and financial condition.

10. *Pricing pressure from our competitors may affect our ability to maintain or increase our product prices and, in turn, our revenue from product sales, gross margin and profitability, which may materially and adversely affect our business, financial condition and results of operations.*

We have uniform pricing across our brands for all sales made in India. Our wholesalers and e-commerce platforms have no control over the price points of our products. In contrast, pricing pressure from competitors may manifest in various forms, including, among others, through our competitors lowering their prices for similar products. Pricing pressure from our customers may lead to a decrease in our revenues and profits. Moreover, if our wholesalers and e-commerce platforms fail to follow our retail price stipulations, our brand value and the public perception of our brand positioning could be negatively affected. We may seek to reduce the price of our raw materials and production through negotiations with our suppliers and our contract manufacturers, respectively, and streamline product designs. We cannot assure you that we will be able to avoid future pricing pressure from our competitors or offset the impact of any price reductions through continued technological improvements, improved operational efficiencies, cost-effective sourcing alternatives, new manufacturing processes, or other cost reductions through other productivity initiatives. If we were to face pricing pressure from our competitors, and the aforementioned measures or other steps we take fail to maintain or increase our margins and revenues from product sales, our business, financial condition and results of operations may be adversely affected.

11. *If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.*

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. For instance, our Company has made applications for changing its name from 'Forcas Studio Private Limited' to 'Forcas Studio Limited', however, we cannot assure you that such licenses will be granted or renewed in time or at all. Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-compliance. If we are unable to renew, maintain

or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled "*Government and Other Approvals*" beginning on page 213 of this Red Herring Prospectus.

12. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it may have a material adverse effect on our Company's results of operations and financial condition. There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

13. *If our Company is unable to continue being creative or if we are unable to keep up to the changing trends in the textile industry, it may adversely affect our business, results of operations and prospects.*

Our results of operations depend upon the continued demand of our products by our customers. Since we operate in a competitive industry where customers' purchases are highly subjective and sensitive to current trends along with creativity, keeping in with the latest trends is one of the key attributes for success. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to update our contract manufacturers and products on a timely basis, we may lose customers to our competitors, or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins. If we are not able to anticipate the demand, or misjudge the quantity, *inter alia*, this could lead to lower sales, higher inventories and higher discounts, each of which could adversely affect our brand, reputation, results of operations and financial condition.

14. *Our business and prospects may be adversely affected if we are unable to maintain and grow the image of our brands.*

Our Company has created a brand presence with our brands '*FTX*', '*TRIBE*' and '*Conteno*'. We sell our products under our brands, which we believe are well recognized, have been developed to cater to our intermediaries and have contributed to the success of our business in the market for denim fabrics. We believe our brand's image serve in attracting intermediaries and end use customers to our products in preference over those of our competitors.

Maintaining and enhancing the recognition and reputation of these brands is critical to our business and competitiveness. Many factors, some of which are beyond our control, are important to maintaining and enhancing our brands, including maintaining or improving customer satisfaction and the popularity of our products and increasing brand awareness through brand building initiatives. In particular, from time to time we showcase newly launched brands and products, and if any of those products do not meet standards for quality and performance or customers' subjective expectations, our brand reputation and the sales of our products may be impacted. If we fail to maintain our reputation, enhance our brand recognition or increase positive awareness of our products, or the quality of our products declines, our business and prospects may be adversely affected.

15. *Our Company does not have long-term agreement with suppliers for supply of raw material. Our inability to obtain raw material in a timely manner, in sufficient quantities could adversely affect our operations, financial condition and/or profitability*

We depend on a number of suppliers for procurement of raw materials required for manufacturing our products. The table below provides top 5 and top 10 supplier of raw materials during the last 3 financial years and stub period:

Particulars	February 29, 2024		March 31, 2023		March 31, 2022		March 31, 2021	
	Value (₹ lakhs)	Percentage of Total Purchase	Value (₹ lakhs)	Percentage of Total Purchase	Value (₹ lakhs)	Percentage of Total Purchase	Value (₹ lakhs)	Percentage of Total Purchase
Top 5 suppliers	3,957.15	59.90%	1,749.52	56.14	3,323.13	75.17%	2,896.34	72.62%
Top 10 suppliers	5,060.98	76.61%	2,463.26	79.05	3,966.61	89.68%	3,623.57	90.85%

Our Company maintains a list of registered and unregistered suppliers from whom we procure the materials on order basis. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Non-availability or inadequate quantity of raw material or use of substandard quality of the raw materials in the manufacture of our products, could have a material adverse effect on our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us. In the event that we fail to secure sufficient quantities of such raw materials from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected.

16. Our business is subject to seasonality. Lower revenues in the festive period of any Fiscal may adversely affect our business, financial condition, results of operations and prospects.

We are impacted by seasonal variations in sales volumes, which may cause our revenues to vary significantly between different quarters in a Fiscal. Typically, we see an increase in our business before Diwali and during end of season sales. Therefore, our results of operations and cash flows across quarters in a Fiscal may not be comparable and any such comparisons may not be meaningful, or may not be indicative of our annual financial results or our results in any future quarters or periods.

17. The business orders which we undertake may be delayed, modified, cancelled, or not fully paid for by our clients and therefore, could materially affect our business, results of operations and financial condition.

The business orders which we undertake may be cancelled or may be subject to changes in scope or schedule. We may also encounter problems executing the orders or executing them on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone an order or cause its cancellation. Such factors could include delays or failures to obtain necessary permits, right-of-way, or receive performance bonds and other types of difficulties or obstructions. Any delay, failure, or execution difficulty with respect to orders in our Order Book could materially affect our business, results of operations and financial condition.

18. Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our products & services;
- maintaining high levels of customer satisfaction;
- costs relating to our operations;
- adhering to our high quality and process execution standards;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in our business operations;
- recruiting, training, and retaining sufficient skilled technical and management personnel; and
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

All of these factors, in combination or alone could negatively impact our revenues and may cause significant

fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

19. We may not be able to maintain our current levels of profitability due to increased costs or reduced trading spreads or margins.

Our business strategy involves a relatively high level of ongoing interaction with our clients. We believe that this involvement is an important part of developing our relationship with our clients, identifying new cross selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the various products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our traded products were to reduce substantially, which could adversely affect our results of operations.

20. There are outstanding litigations involving our Company which, if determined adversely, may affect our business and financial condition.

As on the date of this Red Herring Prospectus, our Company is involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

21. *If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.*

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

22. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of denim fabrics from our suppliers before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks are required to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we make provisions for bad debts, including those arising from such defaults based primarily age of the debt and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and

could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

23. *If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.*

Our Company's success largely depends on our brand name and brand image, therefore we have trademarked our brand names and their logos differentiating our Company's products from that of our competitors. We deal under other brand names as well, which have also been trademarked by us to maintain a distinction and differentiation for our products and brands. Our current trademark and logo **FTX**, is owned by our Company under the provisions of the Trademarks Act, 1999. Our trademarks may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales and higher administrative costs.

Further, we believe that there may be other companies or vendors which operate in the unorganized segment using our tradename or brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. We rely on protections available under Indian law, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving, and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition.

We are also exposed to the risk that other entities may pass off their products as ours by imitating our brand name and attempting to create counterfeit products. We believe that there may be other companies or vendors which operate in the unorganized segment using our brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. Furthermore, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming, continuous supply of denim fabrics or to deliver our costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which might adversely affect our business, results of operations and financial condition.

24. *We do not own any premises used by our Company. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our business.*

The Registered Office and the warehouse of our Company is taken on lease for a fixed tenure. The lease is renewable on mutually agreed terms. Upon termination of the lease, we are required to return the said business premises to the Lessor/Licensor, unless renewed. There can be no assurance that the term of the agreements will be renewed and in the event the Lessor/Licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we are required to vacate our offices, we may be required to identify alternative premises and enter into fresh lease or leave and license agreement. We may have to find new premises which may lead to higher costs.

25. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in

addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company might not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which might have an adverse effect on our business, results of operations and financial condition.

- 26. *We are dependent on third party transportation providers for delivery of garments to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations may adversely affect our business, financial condition and results of operation.***

In order to ensure smooth functioning of our business operations, we need to maintain continuous supply and transportation of the products from the suppliers to our Company and transportation of our products to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of garments to us and delivery of our products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of products is likely to have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to deliver our products to our customers in a timely, efficient and reliable manner may adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long-term agreements with our transporters and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfil their obligations or would not commit a breach of the understanding with us. While, our supplier avail insurance for the products transported to us and charge the costs of the same to our Company, however, in the event that the products suffer damage or are lost during transit, and in the event the insurance is insufficient to cover the damage suffered by us, we may not able to prosecute the transport agencies due to lack of formal agreements and may have to bear additional costs, which could strain our financial resources. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which might adversely affect our business, results of operations and financial condition.

- 27. *If we are unable to identify customer demand accurately and maintain an optimal level of inventory proportionately, our business, results of operations and financial condition may be adversely affected.***

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in such identification could result in either surplus stock, which we may not be able to sell in a timely manner, or no stock at all, or under stocking, which will affect our ability to meet customer demand. We plan our inventory and estimate our sales based on the forecast, demand and requirements for our products based on past data. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively by readily making our products available to our customers. Ensuring continuous availability of our products requires prompt turnaround time and a high level of coordination across suppliers, inventory management and departmental coordination. While we aim to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. If we over-stock inventory, our capital requirements may increase and we may incur additional financing costs. Any unsold inventory would have to be sold at a discount, leading to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations and financial condition. If we under-stock inventory, our ability to meet customer demand may be adversely affected.

- 28. *We rely significantly on our direct marketing network for sale of our products. Also, we do not have any formal agreement with our customers.***

We sell our products through our direct marketing network and through our marketing and sales executives. As on date, we do not have any formal agreement with our customers. In the absence of any formal agreement with them, these clients may stop purchasing our products which may adversely affect our operations. Furthermore, our business growth depends on our ability to attract additional customers and widen our network and our marketing and sales executives. While we believe, that we have good relations with our customers but there is no assurance that our

customers will continue to do business with us or that we can continue to attract additional customers. If we do not succeed in maintaining the stability of our customer network, our market share may decline, materially affecting our results of operations and financial condition. However, we have been constantly adding more customers which is evident from our growth in sales.

29. We face risks of delisting or debarment from online platforms.

We have recently started selling our products through certain online commercial platforms. In the event, we receive negative reviews on our products or receive complaints in respect of products supplied by us, we may face the risk of delisting or debarment from online platforms. Damage caused to our business reputation and brand name may deter users from using our brands, which may have an adverse effect on our financial performance and prospects.

30. Our Promoters, Directors, Key Managerial Personnel and Senior Management have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.

Our Promoters, Directors, Key Managerial Personnel and Senior Management, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Directors, Key Managerial Personnel and Senior Management may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details please refer to the paragraphs titled — “Interest of our Directors” in the chapter titled — “Our Management”, the paragraphs titled — “Interest of our Promoters and Other Interests and Disclosures” in the chapter titled — “Our Promoters and Promoter Group”, “Financial Indebtedness” and “Restated Financial Information” on pages 154, 194 and 160, respectively of this Red Herring Prospectus.

There can be no assurance that our Promoters, Directors, Key Managerial Personnel and Senior Management will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

31. We have certain contingent liabilities and our financial condition and profitability may be adversely affected if any of these contingent liabilities materialize.

As on February 29, 2024, our contingent liabilities and commitments (to the extent not provided for) as disclosed in the notes to our Restated Financial Information, aggregated to ₹ 230.52 lakhs. The details of our contingent liabilities are as follows:

Contingent Liabilities and Capital commitments	29-Feb-2024	11-Jan-2024	31-Mar-2023	31-Mar-2022	31-Mar-2021
Estimated amount of contracts remaining to be executed on capital account and not provided for (net of advances)	-	-	-	-	-
Other commitments relating to settlement of litigation disputes	-	-	-	-	-
Disputed demands with various government departments.	230.52	230.52	230.52	-	-

If any of these contingent liabilities materialize, our results of operations and financial condition may be adversely affected. For further details of our contingent liabilities, see the chapter titled “Financial Statements” beginning on page 160 of this Red Herring Prospectus. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

32. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow from operating activities in the past, the details of which are provided below:

(₹ in lakhs)

Particulars	For the eleven months period ended February 29, 2024	For the year ended March 31,		
		2023	2022	2021
Net Cash from Operating Activities	(736.62)	533.90	251.44	254.19

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

33. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold not less than [●]% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

34. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.*

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined through fixed price mechanism. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "Capital Structure" on page 64 of this Red Herring Prospectus.

35. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

36. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of February 29, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — "Restated Financial Information" at page 160.

While we believe that all our related party transactions have been conducted on an arm's length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

37. *Our Promoters have extended personal guarantees and personal properties as collateral security with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.*

Our Promoters have extended personal guarantees to secure the loans availed by our Company and have also provided personal properties as collateral for securing the secured loans availed by our Company from secured lenders. In the event any of these guarantees are revoked or if the personal property of our Promoters is withdrawn, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. If the guarantees is invoked, the ability of our Company to continue its business operations could be adversely affected. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations. For further details please refer to the chapter titled “*Financial Indebtedness*” on page 194 of this Red Herring Prospectus.

38. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future. For details of these restrictive covenants, please refer to chapter titled — “*Financial Indebtedness*” on page 194 of this Red Herring Prospectus.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company’s financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

39. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

As on March 31, 2024 our Company’s total outstanding secured loans are ₹ 3,138.46 lacs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations. For details of our indebtedness, please refer to the chapter titled — “*Financial Indebtedness*” on page 194 of this Red Herring Prospectus.

40. *We intend to utilise a portion of the Net Proceeds for funding of upgradation of our warehouse. We are yet to place orders for materials required for upgrading our warehouse.*

Our Company proposes to utilise an amount of ₹165.67 lakhs from the Net Proceeds for funding the capital expenditure towards upgradation of exiting warehouse at Tara Maa Tower, B3-71C/161 B B T Road, Vivekanandapur, South 24 Parganas, Thakurpukur Mahestola – 700 141, West Bengal, India. Our Company is engaged in the business of manufacturing and selling of menswear and men’s garments under our own brand, through white-labelling, *i.e.*, for other brands such as, Landmark Group, V-Mart Retail, V2 Retail, Highlander, Cobb, Kontail, *etc.*, and through online e-commerce platforms. Once we receive the final product from our contract manufacturers we stock the same at our warehouse and further sell to our customers. Accordingly, we wish to utilise a portion of the Net Proceeds towards funding the capital expenditure towards upgradation of exiting warehouse. Our Company has obtained third party quotations for purchasing materials required for upgradation of exiting warehouse, however we are yet to place orders worth ₹ 165.67 lakhs, for purchase of such material. Further, the cost of the materials is based on the quotations received from suppliers and such quotations are subject to change due to various factors such as, change in supplier of material, change in the government regulation and policies, change in management’s view of desirability of the current plans, possible cost overruns, *etc.* Since, our Company has not yet placed orders for the said material, we cannot assure that we will be able to procure the same in a timely manner and at the same price at which the quotations have been received. Delay in procurement of the same can compel our Company to buy such materials at a higher price, thus causing the budgeted cost to vary. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected.

- 41. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 73 of this Red Herring Prospectus.

- 42. *Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain borrowings availed by our Company and accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.***

Our Company intends to utilise a part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain borrowings availed by our Company. The details of the loans identified to be repaid or prepaid using the Net Proceeds have been disclosed in the section titled “*Objects of the Issue*” on page 73 of this Red Herring Prospectus. While we believe that utilization of Net Proceeds for repayment of secured loans would help us to reduce our cost of debt and enable the utilization of our funds for further investment in business growth and expansion, the pre-payment of loans will not result in the creation of any tangible assets for our Company.

- 43. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial Personnel and our Senior Management. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Senior Management and our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel and Senior Management in the past, however, any attrition of our experienced Key Managerial Personnel and Senior Management, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel and Senior Management who leave. In the event we are unable to motivate and retain our Key Managerial Personnel and Senior Management and thereby lose the services of our highly skilled Key Managerial Personnel and Senior Management may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For

further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 142 of this Red Herring Prospectus.

44. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have provided security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over our movable and immovable properties. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be subject to forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information, kindly refer the chapter titled “*Financial Indebtedness*” beginning on page 194 of this Red Herring Prospectus.

45. *Our Company has availed certain unsecured loans which may be recalled at any time.*

Our Company has availed certain unsecured loans, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations. For further details, see “*Financial Indebtedness*” on page 194 of this Red Herring Prospectus.

46. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency, however shall be monitored by our Audit Committee and shall be purely dependent on the discretion of the management and Audit Committee of our Company*

Since the Issue size is less than ₹ 10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. However, pursuant to the Companies Act and SEBI Listing Regulations, our Company shall, on a quarterly basis, disclose to the Audit Committee, the uses and applications of the Gross Proceeds raised through this Issue. The Audit Committee shall make recommendations to our Board for further action, if necessary. This information will also be published in the interim or annual financial results after review by the Audit Committee and its explanation in the director’s report. The deployment of funds raised through this Issue, is hence, at the discretion of the Audit Committee and the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

47. *Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in this Red Herring Prospectus would be subject to certain compliance requirements, including prior shareholders’ approval.*

Our Company intends to use approximately ₹ 2,665.67 lakhs of the Net Proceeds towards (i) funding of upgradation of warehouse; (ii) prepayment or repayment of certain secured loans availed by our Company; (iii) funding of working capital requirements of our Company. Our Board will have flexibility in temporarily investing the Net Proceeds as well as its inter se allocation across various heads, as disclosed in the section titled “*Objects of the Issue*” on page 41. In case of any exigencies arising out of business conditions, economic conditions, competition or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure or fund which expenditure cannot be determined with certainty as on the date of this Red Herring Prospectus. In terms of Section 27 of the Companies Act, 2013 and all other applicable laws, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in this Red Herring Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilisation of the Net Proceeds disclosed in this Red Herring Prospectus, we cannot assure that we will be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations.

Further, our Promoter would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue. Additionally, the requirement on Promoter to provide an exit opportunity to such dissenting shareholders may deter the Promoter from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized

proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in this Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, which may adversely affect our business and results of operations

48. *The requirement of funds in relation to the objects of the Issue has not been appraised.*

We intend to use the proceeds of the Issue for the purposes described in the section titled “*Objects of the Issue*” on page 73. The objects of the Issue have not been appraised by any bank or financial institution. These are based on management estimates and current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

49. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 159 of this Red Herring Prospectus.

50. *We have not independently verified certain data in this Red Herring Prospectus.*

We have not independently verified data from the industry and related data contained in this Red Herring Prospectus. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

51. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

52. *The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for the Equity Shares.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

53. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited due to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

54. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

55. *The price of the Equity Shares may be highly volatile after the Issue.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

56. *You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.*

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within three (03) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI. SEBI pursuant to its circular bearing reference number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 has reduced the time taken for listing of specified securities after the closure of public issue to 3 working days (T+3

days) as against the previous requirement of 6 working days (T+6 days); 'T' being issue closing date. The provisions of this circular were applicable, on voluntary basis for public issues opening on or after September 1, 2023 and on mandatory basis for public issues opening on or after December 1, 2023. Our Company shall follow the timeline provided under the aforementioned circular.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

57. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

58. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the industries in which we operate;
- adverse media reports about us or the industries in which we operate;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

- 59. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.**

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

- 60. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.**

Any instance of disinvestments of Equity Shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

EXTERNAL RISK FACTORS

- 61. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.**

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024 and the Ministry of Finance has notified the Finance Act, 2023 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the Personal Data Protection Bill, 2019 (“**PDP Bill**”) was introduced to propose a legal framework governing the processing of personal data. However, the PDP Bill has been withdrawn on August 3, 2022 and the Ministry of Electronics and Information Technology, Government of India (“**MoEIT**”) has submitted a new Digital Personal Data Protection Bill, 2022 before the Parliament.

We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

- 62. Our business is substantially affected by prevailing economic conditions in India.**

We perform all of our activities in India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are

significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries; and
- prevailing national, regional or global economic conditions, including in India's principal export markets.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the industries in which we operate.

63. *Foreign investors are subject to foreign investment restrictions under Indian law.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

64. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

65. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

66. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

67. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

68. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely*

affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

For details in this regards, specific attention is invited to the chapter titled “*Issue Procedure*” beginning on page 237 of this Red Herring Prospectus.

The process of Book Building under the SEBI ICDR Regulations is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to making a Bid or application in the Issue.

For further details on the method and procedure for Bidding, please see section entitled “*Issue Procedure*” on page 237 of this Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. Consequently, the fund requirements of our Company are subject to revisions in the future at the discretion of the management. In the event of any shortfall of funds for the activities proposed to be financed out of the Net Proceeds as stated above, our Company may re-allocate the Net Proceeds to the activities where such shortfall has arisen, subject to compliance with applicable laws. Further, in case of a shortfall in the Net Proceeds or cost overruns, our management may explore a range of options including utilising our internal accruals or seeking debt financing. Key assumptions for working capital requirements

Our Company's estimated working capital requirements on a standalone basis are based on the following key assumptions:

S. No.	Particulars	Assumptions
Current Assets		
1	Trade Receivables	Our Company's general credit terms vary across online and offline sales. We had Debtors Holding days of 132, 39 days, 59 days and 89 days in FY2021, FY2022, FY2023 and for the period ended February 29, 2024. During FY2021, the debtor holding period was higher due to Covid19 impact. We expect Debtors Holding days to be around 59 days for FY2024 and 48 days for FY 2025. This will be almost at par with FY2023.
2	Inventories	Inventory levels are maintained by our Company depending upon the demand and delivery schedules. We had inventory turnover days of 175, 214 days, 102 days and 81 days in FY2021, FY2022, FY2023 and for the period ended February 29, 2024. During FY2021, the inventory holding period was higher due to Covid19 impact. We are making effort to improve its inventory turnover days and expect the same to be around 96 days in FY2024 and 83 days for FY2025 as compared to 102 days in FY2023.
Current Liabilities		
1	Trade Payables	We had creditors payment cycle of 133, 65 days, 43 days and 48 days in FY2021, FY2022, FY2023 and for the period ended February 29, 2024. During FY2021, the creditors payment cycle was higher due to Covid19 impact. We expect our creditors

S. No.	Particulars	Assumptions
		payments days be around 42 days for FY2024 and 14 days for FY2025 as compared to 43 days in FY2023.

Details of total number of units sold in last 3FYs and stub period

The number of units sold by the Company during the last 3 financial years and stub period are as under:

Period	April 1, 2023 till February 29, 2024	FY 2022-23	FY 2021-22	FY 2020-21
No. of units sold (in pcs)	67,10,204	49,98,324	40,46,386	38,43,865

Justification for increase/ decrease in working capital requirement for the FY2023 and estimated period:

During the fiscal year 2022-23, the total working capital requirement was Rs. 2,551.67 Lakhs. However, this is estimated to increase to Rs. 3,811.26 Lakhs during the fiscal year 2023-24 and Rs. 6,173.71 Lakhs during the fiscal year 2024-25.

The substantial working capital requirement, increasing from Rs. 2,551.67 lakhs in the fiscal year 2023 to Rs.3,792.34 lakhs in the period ended February 29, 2024 can be attributed to increase in the Company's operation during this period. The Company has expanded its presence from 4 online marketplaces to 8 online marketplaces during the said periods. This shift is evident in the comparison of sale, which went from Rs. 6,960.46 Lakhs in FY2023 to Rs. 9,607.24 during the period ended February 29, 2024.

This surge in turnover had direct impact on the Company's working capital requirements due to specific changes in the following areas:

- Outstanding Receivables:** The rise in volume of sales, which in turn necessitated an increase in outstanding receivables. As the company offered credit to its customers, funds became locked in pending invoices, resulting in an expansion of the working capital needed.
- Inventories:** Similar to reasons specify for increase in trade receivable, owing to the Company's expectation of higher sale, it is expected that substantial amount of inventory for stock of finish goods and raw materials will be kept in stock.
- Payment to Suppliers:** Over the past few years, there was a reduced payment cycle to vendors. This leads to a decrease in trade payables leading to a higher working capital requirement. For example, our Company maintained holding level of trade payable at 65 days and 43 days in 2021-22 and 2022-23 respectively, which support a lower working capital requirement. In FY2024 the payment cycle reduced to 42 days, as we have higher liquidity which enables us to reduce payment cycle of creditors. Further, we are expecting payment cycle to reduce to 14 days in FY 2024-25 from 42 days in FY 2023-24, on account of faster payment to receive discount and better pricing of our raw materials from our suppliers, to achieve higher profit margins. This will have a direct impact on our working capital and require higher working capital.

Rationale for high working capital ratio in FY2021 and FY2022:

During the FY2021 and FY2022, the Company used to sell predominantly to large format stores and wholesalers wherein the standard credit period offered to them ranged in between 45-90 days. As the company is into manufacturing of apparels, the stock holding period ranges between 3-4 months.

In FY2021 due to Covid19, many business indeed experienced slowdowns or significant disruptions, the company was no exception to it. Because of the same the overall trade got severely impacted and as a result of which the working capital cycle got increased.

Moreover, in the FY2022 again Covid19 relapsed and the heat of the same was felt by almost every industry. Because of Covid uncertainty the pick-up of the orders placed by the customers got delayed which resulted in increase in inventory level and overall working capital requirement.

Rationale for reduction in working capital requirement in FY2023

In FY2023, the business scenario got normalized. Capitalising the opportunity, the Company strategically increased its presence multi-fold in the online marketplaces. The Company has achieved higher sales and faster delivery of product to the customers, resulting in faster conversion of stock into sales. This led to the overall working capital requirement normalised and reduced as compared to working capital requirement of FY2022.

Rationale for increase in working capital requirement in stub period

The net working capital for the stub period was Rs.3,792.34 Lacs as compared to Rs.2,551.67 Lacs for FY2023. The reason for the increase in net working capital requirement was mainly due to delay in the onset of winter season because of which the debtors and inventory levels increased. Due to delay of winter season the demand of the winter goods got delayed. Hence, the entire supply chain from inventory to debtors to payment cycle gets elongated to balance the delay in the season. The Company has ended FY2024 with turnover of around Rs.112.37 crores recording a growth of around 61.46% as compared to FY2023 which ended with Rs. 69.60 crores. Considering the same, the Company has estimated revenue of Rs. 200 crores in FY2025. Further, the surge in turnover had direct impact on the Company's working capital requirements due to specific changes in the following areas:

- ***Inventories of raw material and finish products:*** The rise in volume of sales in turn necessitated an increase in inventories. The Company is in fashion industry which is season driven, i.e. the Company experience significant surge in sale during festive and winter seasons during September to next year February, and for the rest of the period the sales are normal but the Company has to keep its inventory ready to meet the higher demand. Because of the growth in revenue, the inventory level in value terms correspondingly increased. As the Company has increased its product portfolio to offer more and more options of fashion to its customers, which in turn resulted in increased inventory to and an expansion of the working capital needed for the stub period as compared FY2023. This strategic approach aligns with our goal of sustaining growth while efficiently managing inventory levels to meet project demands effectively.
- ***Debtors holding period:*** The rise in volume of sales in turn resulted in higher debtors. As stated earlier, delay in the onset of winter season, the whole working capital cycle got elongated and debtors were no exception to it. The debtor holding period increased from 59 days in FY2023 to 89 days during the stub period. This has resulted in expansion of the working capital needed for the stub period as compared FY2023.

GLOBAL OUTLOOK

The global economic recovery from the COVID-19 pandemic, Russia’s invasion of Ukraine, and the cost-of-living crisis is proving surprisingly resilient. Inflation is falling faster than expected from its 2022 peak, with a smaller-than-expected toll on employment and activity, reflecting favorable supply-side developments and tightening by central banks, which has kept inflation expectations anchored. At the same time, high interest rates aimed at fighting inflation and a withdrawal of fiscal support amid high debt are expected to weigh on growth in 2024.

Growth resilient in major economies - Economic growth is estimated to have been stronger than expected in the second half of 2023 in the United States, and several major emerging market and developing economies. In several cases, government and private spending contributed to the upswing, with real disposable income gains supporting consumption amid still-tight—though easing—labor markets and households drawing down on their accumulated pandemic-era savings. A supply-side expansion also took hold, with a broad-based increase in labor force participation, resolution of pandemic-era supply chain problems, and declining delivery times. The rising momentum was not felt everywhere, with notably subdued growth in the euro area, reflecting weak consumer sentiment, the lingering effects of high energy prices, and weakness in interest-rate-sensitive manufacturing and business investment. Low-income economies continue to experience large output losses compared with their prepandemic (2017–19) paths amid elevated borrowing costs.

Inflation subsiding faster than expected - Amid favorable global supply developments, inflation has been falling faster than expected, with recent monthly readings near the prepandemic average for both headline and underlying (core) inflation (Figure 1). Global headline inflation in the fourth quarter of 2023 is estimated to have been about 0.3 percentage point lower than predicted in the October 2023 WEO on a quarter-over-quarter seasonally adjusted basis. Diminished inflation reflects the fading of relative price shocks— notably those to energy prices—and their associated pass-through to core inflation.¹ The decline also reflects an easing in labor market tightness, with a decline in job vacancies, a modest rise in unemployment, and greater labor supply, in some cases associated with a strong inflow of immigrants. Wage growth has generally remained contained, with wage-price spirals—in which prices and wages accelerate together—not taking hold. Near-term inflation expectations have fallen in major economies, with long-term expectations remaining anchored.

Sources: Haver Analytics; and IMF staff calculations.

Note: The figure plots the median of a sample of 57 economies that accounts for 78 percent of World Economic Outlook world GDP (in weighted purchasing-power-parity terms) in 2023. Vertical axes are cut off at -4 percent and 16 percent. The bands depict the 10th to 90th percentiles of inflation across economies. “Core inflation” is the percent change in the consumer price index for goods and services, excluding food and energy (or the closest available measure). AEs = advanced economies; EMDEs = emerging market and developing economies.

High borrowing costs cooling demand - To reduce inflation, major central banks raised policy interest rates to restrictive levels in 2023, resulting in high mortgage costs, challenges for firms refinancing their debt, tighter credit availability, and weaker business and residential investment. Commercial real estate has been especially under pressure, with higher borrowing costs compounding postpandemic structural changes. But with inflation easing, market expectations that future policy rates will decline have contributed to a reduction in longer-term interest rates and rising equity markets (Box 1). Still, long-term borrowing costs remain high in both advanced and emerging market and developing economies, partly because government debt has been rising. In addition, central banks’ policy rate decisions are becoming increasingly asynchronous. In some countries with falling inflation—including Brazil and Chile, where central banks tightened policy earlier than in other countries—interest rates have been declining since the second half of 2023. In China, where inflation has been near zero, the central bank has eased monetary policy. The Bank of Japan has kept short-term interest rates near zero.

The Forecast

Growth Outlook: Resilient but Slow

Global growth, estimated at 3.1 percent in 2023, is projected to remain at 3.1 percent in 2024 before rising modestly to 3.2 percent in 2025 (Table 1). Compared with that in the October 2023 WEO, the forecast for 2024 is about 0.2 percentage point higher, reflecting upgrades for China, the United States, and large emerging market and developing economies. Nevertheless, the projection for global growth in 2024 and 2025 is below the historical (2000–19) annual average of 3.8 percent, reflecting restrictive monetary policies and withdrawal of fiscal support, as well as low underlying productivity growth. Advanced economies are expected to see growth decline slightly in 2024 before rising in 2025, with a recovery in the euro area from low growth in 2023 and a moderation of growth in the United States. Emerging market and developing economies are expected to experience stable growth through 2024 and 2025, with regional differences.

World trade growth is projected at 3.3 percent in 2024 and 3.6 percent in 2025, below its historical average growth rate of 4.9 percent. Rising trade distortions and geo economic fragmentation are expected to continue to weigh on the level of global trade. Countries imposed about 3,200 new restrictions on trade in 2022 and about 3,000 in 2023, up from about 1,100 in 2019, according to Global Trade Alert data.

These forecasts are based on assumptions that fuel and nonfuel commodity prices will decline in 2024 and 2025 and that interest rates will decline in major economies. Annual average oil prices are projected to fall by about 2.3 percent in 2024, whereas nonfuel commodity prices are expected to fall by 0.9 percent. IMF staff projections are for policy rates to remain at current levels for the Federal Reserve, the European Central Bank, and the Bank of England until the second half of 2024, before gradually declining as inflation moves closer to targets. The Bank of Japan is projected to maintain an overall accommodative stance.

For advanced economies, growth is projected to decline slightly from 1.6 percent in 2023 to 1.5 percent in 2024 before rising to 1.8 percent in 2025. An upward revision of 0.1 percentage point for 2024 reflects stronger-than-expected US growth, partly offset by weaker-than-expected growth in the euro area:

- In the United States, growth is projected to fall from 2.5 percent in 2023 to 2.1 percent in 2024 and 1.7 percent in 2025, with the lagged effects of monetary policy tightening, gradual fiscal tightening, and a softening in labor markets slowing aggregate demand. For 2024, an upward revision of 0.6 percentage point since the October 2023 WEO largely reflects statistical carryover effects from the stronger-than-expected growth outcome for 2023.
- Growth in the euro area is projected to recover from its low rate of an estimated 0.5 percent in 2023, which reflected relatively high exposure to the war in Ukraine, to 0.9 percent in 2024 and 1.7 percent in 2025. Stronger household consumption as the effects of the shock to energy prices subside and inflation falls, supporting real income growth, is expected to drive the recovery. Compared with the October 2023 WEO forecast, however, growth is revised downward by 0.3 percentage point for 2024, largely on account of carryover from the weaker- than-expected outcome for 2023.
- Among other advanced economies, growth in the United Kingdom is projected to rise modestly, from an estimated 0.5 percent in 2023 to 0.6 percent in 2024, as the lagged negative effects of high energy prices wane, then to 1.6

percent in 2025, as disinflation allows an easing in financial conditions and permits real incomes to recover. The markdown to growth in 2025 of 0.4 percentage point reflects reduced scope for growth to catch up in light of recent upward statistical revisions to the level of output through the pandemic period. Output in Japan is projected to remain above potential as growth decelerates from an estimated 1.9 percent in 2023 to 0.9 percent in 2024 and 0.8 percent in 2025, reflecting the fading of one-off factors that supported activity in 2023, including a depreciated yen, pent-up demand, and a recovery in business investment following earlier delays in implementing projects.

- In emerging market and developing economies, growth is expected to remain at 4.1 percent in 2024 and to rise to 4.2 percent in 2025. An upward revision of 0.1 percentage point for 2024 since October 2023 reflects upgrades for several regions.
- Growth in emerging and developing Asia is expected to decline from an estimated 5.4 percent in 2023 to 5.2 percent in 2024 and 4.8 percent in 2025, with an upgrade of 0.4 percentage point for 2024 over the October 2023 projections, attributable to China's economy. Growth in China is projected at 4.6 percent in 2024 and 4.1 percent in 2025, with an upward revision of 0.4 percentage point for 2024 since the October 2023 WEO. The upgrade reflects carryover from stronger-than-expected growth in 2023 and increased government spending on capacity building against natural disasters. Growth in India is projected to remain strong at 6.5 percent in both 2024 and 2025, with an upgrade from October of 0.2 percentage point for both years, reflecting resilience in domestic demand.
- Growth in emerging and developing Europe is projected to pick up from an estimated 2.7 percent in 2023 to 2.8 percent in 2024, before declining to 2.5 percent in 2025. The forecast upgrade for 2024 of 0.6 percentage point over October 2023 projections is attributable to Russia's economy. Growth in Russia is projected at 2.6 percent in 2024 and 1.1 percent in 2025, with an upward revision of 1.5 percentage points over the October 2023 figure for 2024, reflecting carryover from stronger-than-expected growth in 2023 on account of high military spending and private consumption, supported by wage growth in a tight labor market.
- In Latin America and the Caribbean, growth is projected to decline from an estimated 2.5 percent in 2023 to 1.9 percent in 2024 before rising to 2.5 percent in 2025, with a downward revision for 2024 of 0.4 percentage point compared with the October 2023 WEO projection. The forecast revision for 2024 reflects negative growth in Argentina in the context of a significant policy adjustment to restore macroeconomic stability. Among other major economies in the region, there are upgrades of 0.2 percentage point for Brazil and 0.6 percentage point for Mexico, largely due to carryover effects from stronger-than-expected domestic demand and higher-than-expected growth in large trading-partner economies in 2023.
- Growth in the Middle East and Central Asia is projected to rise from an estimated 2.0 percent in 2023 to 2.9 percent in 2024 and 4.2 percent in 2025, with a downward revision of 0.5 percentage point for 2024 and an upward revision of 0.3 percentage point for 2025 from the October 2023 projections. The revisions are mainly attributable to Saudi Arabia and reflect temporarily lower oil production in 2024, including from unilateral cuts and cuts in line with an agreement through OPEC+ (the Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters), whereas non-oil growth is expected to remain robust.
- In sub-Saharan Africa, growth is projected to rise from an estimated 3.3 percent in 2023 to 3.8 percent in 2024 and 4.1 percent in 2025, as the negative effects of earlier weather shocks subside and supply issues gradually improve. The downward revision for 2024 of 0.2 percentage point from October 2023 mainly reflects a weaker projection for South Africa on account of increasing logistical constraints, including those in the transportation sector, on economic activity.

The Indian Economy

IMF sources reveal that the Indian economy edged past the UK to become the fifth largest economy of the world and has been still growing at an astounding rate despite many global headwinds. Case in point, on March 1, 2024, Mint, the business and financial daily, reported that the Indian economy grew by 8.4% in the third quarter of the financial year 2023-24.

Based on this data, India's Statistical Ministry prepared a second advanced estimate of the full-year GDP growth and pegged it to 7.6% which will make it one of the fastest-growing major economies of the world. The earlier estimate was 0.3% lower than the recent one.

The trend of India outgrowing other economies is likely to continue for a long time. In fact, according to experts, India is projected to overtake Japan and Germany by 2030 to become the third largest economy of the world and is estimated to become 2nd largest economy by 2048.

Consumption in India

This stellar growth is the result of several measures taken by the governments over the years, e.g. liberalisation, abolishing license raj, an increasing focus on infrastructure investment and more. All these reforms eventually led to a heightened purchasing power for the common Indian consumers and a resultant service, manufacturing, construction and consumption boom.

This consumption boom has been particularly evident in the purchase of automobiles, electronics, and branded lifestyle products. The internet and e-commerce platforms have further democratised access to these goods, breaking geographical barriers and reaching previously untapped markets. The rise of consumer credit has also made it easier for individuals to finance their purchases.

In FY24, a strong Private Final Consumption Expenditure (PFCE) driven by sustained growth in urban demand and recovery in rural demand is supporting India's growth. According to the NSO, the share of private final consumption expenditure (PFCE) in India's GDP in FY24 is expected to be 60.3%. India Ratings (Ind-Ra) expects PFCE to grow by 6.1 per cent in 2024-25 compared to 4.4% in the 2023-24 financial year.

Thus, driven by strong policy support, a growing middle class and a sizeable young population, a significant amount of investment is flowing into the country, facilitating an economic uprising and lifting more and more people out of poverty every year. That is why, experts believe that the Indian consumption story is likely to continue beyond FY24 and could last many more decades to come.

Indian apparel market

The domestic apparel market can also be broadly divided by price into super premium, premium, medium, economy, and value segments. The medium price segment holds majority of the share among apparel segment followed by economy segment. The price sensitive rural population forms a major part of the value and economy price segments of apparel market. Further, driven by the twin trends of premiumisation and value consciousness, the mid-market segment is being squeezed on both sides by the value and the premium segments. Demand for various apparel categories varies substantially across the country. The urban metro market comprising cities such as Delhi NCR, Mumbai, Bengaluru, Chennai, etc., is the biggest market for apparel in India and contributes over 20% to the Indian apparel market. Considering that less than 20% of India's population lives in these cities indicate the higher purchasing power in urban areas and frequency of purchases. The metros also witness huge penetration of women's western wear as compared to Tier -I or Tier -II cities of the country. High real estate costs, competition among branded players and saturation in metro cities of the country have driven big brands to move towards the smaller cities. The increasing purchasing capacity and awareness of fashion and trend in small cities has also resulted in providing a huge market to the organised players of the country. The rural apparel market in India is still primarily catered by unbranded and unorganised local players. Need based clothing and price sensitivity among people of rural India does not make it a lucrative market for branded players.

Demand Drivers for the Textiles and Apparel industry:

The demand for textiles and apparel is being primarily driven by 1) rise in disposable income which increases ability to consume, 2) increased usage of plastic money leading to impulsive buying among the Indian consumers, 3) intensifying urbanization leading to demand of varied goods and services, 4) positive demographic dividend along with changing consumer preference (ready to stitch), 5) increased organized retail which increases availability and the rise of private labels coupled with increase in (Ready to wear) RTW rather than RTS (Ready to Stitch), and 6) growth of internet penetration and rise of e-commerce as a viable alternative sales channel.

Additionally, effective implementation of several regulatory measures such as Technology Up-gradation Fund Scheme (TUFS), Refund of State Levies (RoSL), and integrated textile parks, the rising mall culture and the multiple international and home-grown premium and super premium brands are also expected to drive the market size of the Indian apparel industry. Furthermore, a low per capita fiber consumption as compared to other nations coupled with factors like growing differentiation of apparels into party-wear, office-wear and semi-formals coupled with increasing share of ethnic wear and designer wear are expected to drive the growth of the apparel industry. Additionally, tapping newer export markets enables exporters to offset both saturation and increased competition in the traditional export markets. Sustainable/

ecofriendly manufacturing is also expected to increase the share of natural fabrics in the industry e.g. Wills Lifestyle stating that it would utilise only natural fabrics. The industry is also undertaking significant investments in technology/ digital to 1) ramp up online presence/ ecommerce activities either in partnership or on a standalone basis, 2) modernize supply chain to increase efficiencies and reduce costs, 3) mass customization to drive demand and increase per capita consumption, and 4) increase marketing, enhance customer loyalty and repeat purchases. However, the recent wave of discounts (both online as well as offline), uncertainty due to the upcoming general elections and rise of protectionist measures/ rhetoric overseas could hamper industry realizations.

Indian online fashion market

The online fashion market is approximately \$11 billion and has grown at around 30% per year since 2019, led by four categories of players: national brands, private labels, digital disruptor brands, and unbranded sellers. National brands are historically established and began largely offline. These include brands such as Louis Philippe, Puma, and Biba. Private labels such as Avaasa from AJIO have been created and scaled by online retailers to expand assortment and fill price gaps. Digital disruptor brands, such as The Souled Store and Bewakoof, were born online and have taken a radically different direct-to-consumer (D2C) approach to scaling the business. Finally, the fashion market has always had a long tail of unbranded sellers with an attractive price-led value proposition.

These players have seen different trajectories over the past four years:

- National brands have turbocharged their online businesses, doubling online share, and now constitute \$2.5 billion online in FY23, having grown at 34% between 2019 and 2023. However, most national brands expect to see a more balanced growth pattern with offline channels as the impact of the pandemic wanes.
- Private labels have scaled to address underserved categories and price points, thereby expanding the target consumer base for branded products.
- Digital disruptors have grown, especially in certain fragmented categories, to \$2.4 billion, with 33% growth yearly since 2019. These new brands have focused on underserved parts of the market and created new offerings that index on value, design aesthetics, speed to market with new trends, or community engagement. Their digital-first operating model enables speed and data-led decision making.

Bain research suggests that the digital disruptor segment will grow rapidly. With a large current market size of approximately \$2.4 billion and a projected annual growth rate of around 35%, digital disruptors have the potential to reach a value of \$10 billion by FY28. Following factors will underpin this shift:

- Young audiences have a greater propensity to try to buy from new brands. As they constitute a growing share of online fashion purchases, the market for digital disruptors will grow.
- Brands that have invested in creating greater awareness are already seeing nonlinear returns on conversion and share of wallet (SoW). Increasingly, this will support returns to scale for such brands to achieve significant leadership positions.
- Over the last five years, beauty and personal care (BPC) (\$950 million) attracted more funding than apparel (\$430 million), excluding the top two outliers in each category. However, as brands demonstrate their scaling playbook, apparel is expected to attract more money.

Disruptor growth and path to profitability

Fashion—apparel, in particular—has relatively low barriers to entry. Nimble digital disruptors with a deep consumer understanding and a focused niche have entered the market in large numbers. Over 700 brands exist today that have created a high-quality product, have invested in customer engagement, and often have a direct-to-customer relationship on social media or via their site. However, Bain analysis suggests that, currently, less than 10% of these brands have scaled beyond INR 50 crore.

Fashion brands face four common challenges on their scaling journeys:

- **Managing assortment complexity:** Relative to beauty and personal care where 12% of stock keeping units (SKUs) drive most sales, fashion has a long tail where the top 20% of SKUs drive less than 50% of sales.
- **New category expansion:** Following the customer would help to identify adjacent categories and expand the SoW. However, customers often buy only two subcategories from a fashion brand.
- **Investing in building the brand:** There is a need to balance the trade-off between immediate customer acquisition spending and medium-term brand investments that have a three-to-four-year payoff.
- **Running efficient operations:** Managing inventory and returns and running agile data-led pricing and markdown optimization can be challenging but is critical.

Learnings from brands that have broken through the initial scale threshold suggest four clear patterns:

- **In fashion, the threshold scale for hitting profitability is low.** Brands can be profitable even at INR 100 crore while retaining enough firepower for growth. Using outsourced production, riding on marketplace infrastructure (physical and digital), and achieving healthy gross margins in the category enable this. Houses of Brands further create significant leverage through shared horizontal investments and capabilities (including in technology and data science).
- **Brands need to address underlying inefficiencies during the growth phase.** During the first three to four years of explosive growth, while customer acquisition costs are elevated, it's often possible for brands to lose sight of other core metrics such as gross margin and realized price. Irrespective of brand stage or type, discipline in range is critical to sustained economics.
- **What you plan is not what you get.** The complexity of assortment management for fashion can affect price realization, inventory, and returns, with a 4 to 5 percentage point (pp) impact on earnings before interest, tax, depreciation, and amortization (EBITDA).
- **Brands, not platforms.** Well-developed e-commerce infrastructure enables brands to run very lean operations. However, some brands that have attempted to build their own infrastructure have incurred high overheads, which can change EBITDA to the extent of 5 to 10 pp.

The next wave of winning brands will not follow the platform playbook but will be true fashion brands, built on differentiated propositions, memorable branding, a sharp understanding of assortment, and tight data-led operations.

Lifestyle market and brand dynamics

Market “brand-ification”

Online fashion is a significant \$11 billion category in FY23, growing at 30% per annum historically since 2019. Growth in the online fashion space, which was previously largely unbranded, is now driven by brands at various price points.

Over the past four years, the online share of national brands has more than doubled, with leading Indian public brands experiencing more than five times the growth in scale compared to pre-Covid levels. Strengthened online distribution, increased marketing efforts, and higher investments in co-creation with e-commerce platforms have driven this.

Private labels have also played a material role in driving online growth, expanding into key category and price point gaps.

Digital disruptors are projected to outpace the overall market growth with 35% annual growth, reaching \$10 billion by FY28 from the current size of \$2.4 billion (see Figure 1). The expectation is that the number of brands exceeding INR 250 crore in revenue will jump five times by FY28, with categories such as expressive wear, ethnic wear, and jewelry having multiple scale brands, while categories such as athleisure/activewear will see a smaller but equally scaled number of brands.

At \$2.4 billion, digital disruptors account for approximately 20% of the Indian online fashion market and are expected to grow

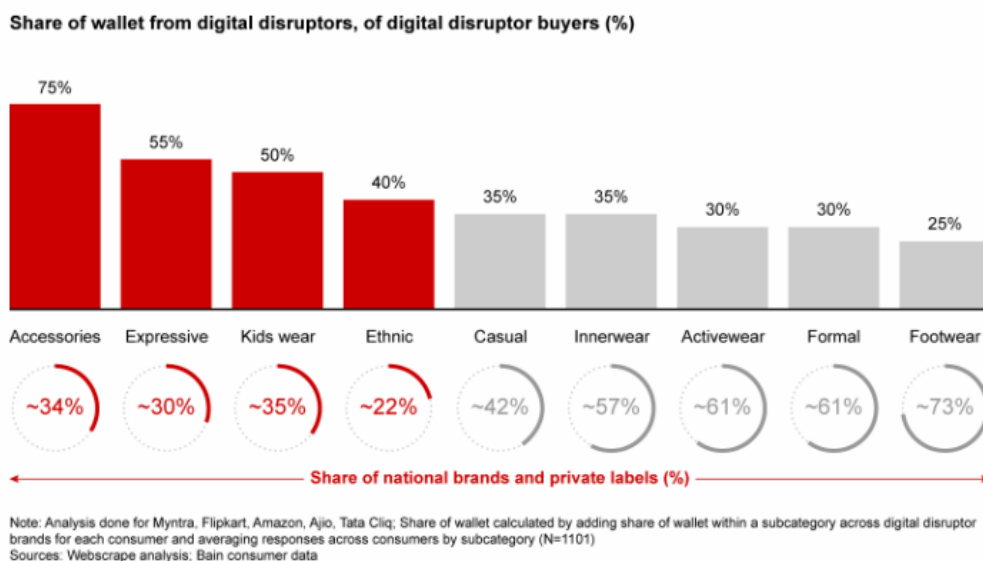

Disruptors: Driven by young customers in fragmented categories

The growth of digital disruptors will be primarily driven by Gen Z and millennials, who have a high propensity to buy fashion online. Website and app data analysis shows that 70% to 80% of the traffic to digital disruptors originates from these segments, with Gen Z accounting for 30% to 35% and millennials for 40% to 45% of the total traffic. Consumer spending analysis shows that 24% of 18-to-24-year-olds buy from digital disruptor brands, compared to just 13% of 45-year-olds and older. Gen Z and millennials will account for approximately 75% of spending on disruptors by FY28, up from approximately 70% today.

Digital disruptors are also addressing younger customers through relevant associations, for example, staying current through merchandising based on the latest pop culture themes or collaborating with end users to co-create “designs of the week” that talk to users directly (see Figure 2).

Few categories have been able to drive high digital disruptor share of wallet owing to low presence of national brands

For example, fashion accessories has historically been a fragmented category with few national brands. This category demands a very wide range, which can be hard to manage. Disruptor jewellery brands have redefined the business model here. One rapidly scaling brand has positioned itself as a “fast fashion destination” for gold jewelry. With over 17,000 designs (and an incremental approximate 1,000 added every quarter), the brand still runs on close to zero finished inventory. Reconfiguring the supply model with technology has made this possible.

Kids wear is another fragmented category with complexity arising from the number of occasions to be served, multiple sizes, and the need to provide quality products in a category with very limited willingness to pay a premium. A leading brand in this space has turned these challenges into an advantage, creating a kids wear destination serving all occasions. Depth in core products enables sharp pricing along with gross margin management. At the same time, full-funnel customer intent data enables flexible inventory management, thus keeping turns as high as six or seven, even with more than 12,000 products. Finally, the full ownership of the customer journey enables true customer lifetime value maximization.

Unlocking the potential of digital disruptors

In recent years, favourable macroeconomic conditions have propelled the scaling of multiple digital disruptors. The initial growth phase up to INR 50 crore primarily revolves around establishing a product–market fit and developing a standout product to generate growth momentum. Subsequently, brands experience a breakout phase, usually between INR 50 crore and INR 100 crore, facilitated by funding that enables investments in assortment expansion, marketing, and channel expansion.

However, as brands surpass the INR 100 crore mark, they often encounter challenges in sustaining growth. These challenges arise due to unrelated product proliferation and inefficient marketing, resulting in operational complexities.

Brands that successfully break out and achieve more than INR 200 crore exhibit disciplined product expansion, structured channels, market strategies, and innovative supply chain management. Crossing the complexity barrier between INR 100 crore and INR 200 crore often leads to accelerated growth for these brands (see Figure 4).

Brands that can break the complexity barrier at INR 100–200 crore typically see high growth after that

Fashion demands a heightened level of discipline due to the ease of entering subcategories through outsourced production, coupled with the inherent difficulty in scaling within new subcategories. Brands often lose sight of sustainable growth and profitability by attempting to build technology infrastructure for scaling or pursuing expansions into unrelated categories requiring substantial upfront investments. Brands can scale when they prioritize a strong focus on product development and customer-centric strategies rather than pursuing blanket channel and business expansions.

Funding to shift toward apparel

In the last five years, the highest investor interest in terms of the number of companies invested in and fund value was observed in the BPC sector, followed by apparel (see Figure 5). However, it is likely funding will shift toward apparel brands as more fashion brands demonstrate a path to profitability or scaled growth.

Unlike in BPC, the long tail of companies in fashion struggled to attract substantial investment

Brand archetypes

Analysis of the financial and operational metrics of over 150 digital disruptor fashion and lifestyle brands reveals five distinct growth patterns (see Figure 6). These archetypes are defined based on revenue, growth, profitability, marketing, and channel focus of brands:

- **Niche brands:** Typically up to INR 50 crore in revenue, and with 20% to 50% growth despite their low bases. Many of these brands have narrow product ranges and very focused marketing investments. Approximately 50% of brands are not funded.
- **Capital-efficient growth hackers:** Approximately 50% of these brands are also not funded. However, they have scaled to approximately INR 100 crore in revenue and grow fast, often at 70% year on year (YoY), despite limited but effective marketing spending. These brands usually have a focused product range with sharp value-led pricing and lean operations.
- **Investing for growth:** Some brands prioritize rapid growth, typically above 70% YoY from the outset, and often spend up to 50% of their revenue on marketing and brand awareness. For these brands, it's crucial to achieve profitability within a defined time frame by reducing marketing investments as organic growth gains momentum.
- **Stars:** Typically brands that have scaled profitably to more than INR 300 crore with growth above 50% YoY and positive EBITDA between 5% and 20%. Their historic investments in a sharp brand and product enabled threshold scale. The brand typically owns the customer via a strong direct to-consumer (D2C) channel, while focused technology investments enable smart pricing, range and inventory management, and lean operations.
- **Questionable:** Several brands, particularly those generating revenue between INR 100 crore and INR 400 crore, face stagnation or high losses in their business. Historic investments are in the sharp brand and product-building-enabled threshold scale. However, poor execution (inefficient marketing and lack of product discipline) has hampered profitability. This further hampers the ability to continue to invest in customer acquisition.

Indian Apparel Market Size:

The apparel industry has two primary segments namely, consumption within the nation and exports from the country. Export numbers of the Apparel industry are readily available; however, market size of the domestic market from a supply side is not readily available (as the size would mean combining the sales revenue of several types of entities, which do not report revenue and the data collection of the same is an inherently daunting and logistically challenging). Hence a suitable proxy from the consumption size has been utilised i.e. value of the private final consumption expenditure (PFCE) on clothing. Consequently, the total market size is a combination of export value of apparel products from India and value of PFCE on clothing in India.

The growth in apparel industry can be attributed to 1) rising per capita disposable income, 2) changing fashion trends, 3) growing consumer class, 4) rising urbanization, 5) increasing retail penetration, 6) growing service class and 7) increasing share of the designer wear. Due to the low investments required for setting up a garment unit, many small players have entered the industry making it highly fragmented. Apparel production is dominated by eight clusters, i.e., Tirupur, Ludhiana, Bangalore, Delhi NCR, Mumbai, Kolkata, Jaipur, and Indore. While Tirupur, Ludhiana and Kolkata are major centres for knitwear; Bangalore, NCR, Mumbai, Jaipur, and Indore are major centres for woven garments. Other key cities include Surat.

Domestic Market Segmentation: The domestic Indian apparel market can be broadly classified into men's wear, women's wear and kids wear. Currently, men's wear holds the largest share in the apparel market. It accounts for 41% of

the market. Women's wear contributes almost 38%, while kids wear contributes the balance 21% of the market.

Government Regulations: In order to increase exports of textiles including readymade garments (RMG), Government has undertaken several measures, which include:

- In March 2019, the Central government approved a scheme to rebate State and Central Embedded Taxes for apparels and made-ups exports.
- Interest Equalization Scheme (IES) provides interest subsidy at 5% per annum on pre and post shipment export credit. Market Access Initiative (MAI) Scheme provides assistance to exporters to participate in various international events and invite buyers to domestic events. IGST has been exempted on import under Advance Authorisation and Export Promotion Capital Goods Scheme (EPCG) for apparel products.
- The Directorate General of Foreign Trade (DGFT) has revised rates for incentives under the Merchandise Exports from India Scheme (MEIS) for Readymade garments and Made ups - from 2% to 4%.
- The Government of India has increased the basic custom duty to 20% from 10% on over 500 textile products, to boost indigenous production and the Make in India program.
- The Government of India announced a Special Package to boost exports by US\$ 31 billion, create one crore job opportunity and attract investments worth Rs 80,000 crore during 2018-2020.
- The Amended Technology Up-gradation Fund Scheme (A-TUFS), scheme is estimated to create employment for 35 lakh people and enable investments worth Rs 95,000 crore by 2022.
- The Integrated Wool Development Programme (IWDP) has been approved to support the entire wool sector value chain to enhance the quality and increase the production during the 2017-18 - 2019-20 period.
- The Government of India has approved a skill development scheme named 'Scheme for Capacity Building in Textile Sector (SCBTS)' with an outlay of Rs 1,300 crore from 2017-18 to 2019-20.
- The Union Ministry of Textiles, Government of India, along with Energy Efficiency Services Ltd (EESL), has launched a technology upgradation scheme called SAATHI (Sustainable and Accelerated Adoption of Efficient Textile Technologies to Help Small Industries) for reviving the powerloom sector of India.

Movement in Credit: The Apparel sector has traditionally issued debt paper for capacity expansion and has generally accounted for a significant proportion of the textile industry. Since FY10, y-o-y growth in bank credit exposure to the sector was consistently lower than the y-o-y growth in overall bank credit to industries, the last year i.e. FY18 being an exception.

Outlook

As textile production is positively correlated to GDP, reduction in economic uncertainties to revive growth in medium to long-term period. The apparel industry is largely consumption-driven and therefore, the economic cycles have a direct

impact on the performance of the industry. High growth in the GDP leads to higher per capita income which in turn increases the purchasing power of the people. Higher purchasing power leads to increased spending, thereby driving the demand for apparels and home textiles while during the economic slowdown, the spending power and in turn consumption decreases.

DETAILS OF OUR BUSINESS

Manufacturing and Distribution Infrastructure

Our procurement, outsourced manufacturing, supply chain and distribution processes are based upon data analytics, with every stage being system-driven. This includes the procurement of materials, allocation of manufacturing to different outsourced manufacturers, inventory management and store replenishment. As a result, we are able to accurately forecast, plan and optimize our operations and ensure that we can meet the needs of our customers. We operate a fully integrated supply chain with high-end quality control standards in the procurement of fabric, an essential component used for the manufacturing of our products.

Our manufacturing process is outsourced which provides an attractive return on capital for our business. We engage our manufacturers on job work basis, so as to maintain our low-cost business model, and production is allocated on a purchase order basis. The factories provide us with manufacturing services strictly in compliance our quality standards and requirements. We have longstanding relationships with these manufacturers.

We also directly procure finished products, such as Denim Pants, Men's Shirts, Men's T-Shirts, Formal/Casual Pants, from third party manufacturers which, once delivered to our centralised warehouse, undergo stringent quality checks. After passing these checks, the goods are dispatched to our customers and for our online retail inventory. Our inventory management processes allow for system-driven distribution and replenishment of inventory and management of our product portfolio through data- driven forecasting of evolving fashion trends across India.

Our Company is not into trading business of any kind. We get our finished garments made from third party manufacturer / job workers in our brand with our specification, trims, style, size etc. The third-party manufacturer / job workers get

the material approved from our quality control team and then undertake the manufacturing under the complete supervision of our Company personnel as a part of quality control measure. Then, we check the same for fabric quality before accepting them. These are then sold through our Sales Channels. This is a standard process in garments industry where any company who is in the process of building a brand outsources some products directly as per specification to fast pace its launches and to meet demands. This helps us not to be completely dependent on existing suppliers and get specialized suppliers for particular products connected with the brand.

Design and Merchandising

Inhouse Team: We have well equipped and skilled designing and production team. From designing of garments to making sure production as per our requirements are done, the whole process is taken up by in-house team.

The process starts with requirements of category of products coming from our marketing team and changing fashions trends, then after the merchandising team plans the SKU range, price range as our target audience and designing of product begins. Samples as per the designs made are prepared in-house which are afterwards provided to the sales and store operation team to review the viability of the product. Once reviewed the same is planned for mass production as per our quantities required.

Product designing is very important part of our business, considering the same, we already have an experienced team for product designing which gives us an advantage to analyze before taking up any production plan.

The whole merchandising process is closely monitored and directed by the top management. We have been working with multiple vendors for multiple categories as we have more than 1 vendor for each category so we have advantage of price negotiation with the supplier on clear terms.

Our design team stays sharp by getting various inputs channeling new information into their creative tanks. Our in-house design team has love for the product and the process too.

Below are some of the responsibilities our merchandising and designing team fulfils:

- Collaborating with suppliers, manufacturers, and wholesalers to ensure proper execution of merchandising plans
- Ensuring retailer compliance with merchandising strategies
- Gathering information on market trends and customers' reactions to products
- Analyzing sales data - reporting growth, expansion, and change in markets

Market research and data analysis: The Indian readymade industry is driven through many factors and the Indian consumers are influenced through many driving factors such as fashion trends, design of the product and pricing of product. To make sure we have all the parameters matched we have our internal research of the product before launching any product.

As we have operate pan India with a specific focus on youth of Bharat, products are to be prepared as per the geographical trend in Men's wear category. The merchandising team has been provided with many options to run research on any product before launching it in the market.

Merchandising takes into account how our products are rated by our consumers in online reviews on marketplaces, and applies certain techniques to make those rating as impactful as possible. It consists of activities carried out by both marketing and sales, such as organizing shelves, social media promotion, and tracking results of merchandising efforts. The biggest advantage of an in-house design team is that it enhances the relationships with the customers. One of the joys in working with an in-house design team is they are immersed in our brand. They understand the brand, our business, how one wants to be perceived by consumers, marketing goals—and they make sure that every decision reflects our brand. Each designer on the in-house design team brings unique industry experience and knowledge, which benefits from time after time. When an in-house design team tells it will take a certain amount of time, one can be rest assured, knowing we are getting a quality product without the inflated timeline.

The value of Brand for an in-house design team is the most important part. This goes beyond simply creating fashion and defining strategy, to actively controlling what is produced and distributed externally.

Inventory and logistics

Our Company has adequate storage capacity for its inventory holding located at the heart of Kolkata. The warehouse is spread across 30,000 sq. ft. of carpet area with main highway road connectivity. The warehouse has proper Electricity supply, Electrical fittings, IT infra as computers, printers, scanners for the team to effectively work. The warehouse also has 250 Storage racks which gives approx. storing capacity of more than 8 (eight) lakhs garments and also adequate space to stock more than 3 (three) lakhs meters of fabric and other raw materials

As the warehouse is located in Kolkata and to the main road transportation facility of inward and supply to stores is available very easily. Labours as and when required are available from local area as to manage the loading and unloading of transport vehicles. Any stock inward is first received at warehouse and quantity is confirmed. After which it is stacked as per the product category and dispatch is done regularly as per the requirements.

Quality Control and Quality Assurance

We are committed to maintaining high quality standards throughout our sourcing, manufacturing and distribution cycles, and have established quality control measures in various facets of our supply chain, including fabric and garment inspections, quality tracking at manufacturers places. We retain control over quality of manufacturing by procuring and providing all raw materials including but not limited to fabrics and other accessories according to our standard operating processes.

In addition, as part of our quality control measures, we regularly inspect the premises, facilities and the manufacturing processes of our factories and require them to return all unutilized raw materials. We have a dedicated quality assurance team responsible for ensuring compliance with our established quality standards.

Sales and Marketing

Internet Marketing: Internet marketing, or online marketing, combines web and email to advertise and drive e-commerce sales.

There's also a lot to be said about online reviews and opinions. Word-of-mouth advertising is unpaid, organic, and powerful because those people who have nice things to say about our product generally have nothing to gain from it other than sharing good news. A recommendation from a friend, colleague, or family member has built-in credibility and has spur dozens of leads who anticipate positive experiences with our brand. We strategize ad-campaigns on online market places to increase our visibility to the millions of customers visiting the websites everyday. This help us to reduce our marketing spend while increased lead generation and has given us an additional marketplace insight.

Industry Events/B2B Marketing: In-person and online tradeshows has remained a top B2B networking tool, due to gathering of companies into one location, whether physical or virtual, to connect and demonstrate our latest products. Trade shows give us the chance to establish or strengthen relationships with key industry partners, customers, and prospects; identify market trends and opportunities; and gain an understanding of what our competitors are offering in the market.

Future Outlook for Marketing Strategy: We are planning mass level activity like paper advertisement, high level social media marketing, radio marketing and engaging a brand ambassador. Our primary focus will be more on social media marketing.

Information Technology

We believe that a robust IT infrastructure is essential for ensuring strong operational efficiencies and enhancing productivity and we continue to focus on building and improving our IT capabilities. In order to better connect with our customers, we regularly update our websites and social media channels to include unique features through which our customers can better engage with our products and can view digital catalogues with our diverse product offering. Our Company uses tally for its accounting purpose and all the invoices and banking is done in the accounts of tally.

COMPETITION

At the time of commencement of our operations, we entered a largely unorganised market. Over the years, we have expanded our product offerings in Menswear categories, and shall attempt to be one of the top brands in the urban Bharat menswear market. Our products compete with local retailers, online retailers, non-branded products, economy brands and products of other established brands.

We believe the principal elements of competition in readymade industry are fashion innovation, finding market fit, assessibility and faster deliveries. We compete against our competitors by establishing ourselves as a knowledge-based unit with industry expertise in fashion trends, price tag and meeting the aspiration of youth, which enables us to provide our customers with innovative designs suitable to current fashion and market requirements.

The E-Commerce segment has gained huge popularity in the last few years, especially owing to the pandemic. There are several established large-scale players in the readymade menswear industry who dominate the e-commerce sector with their products. Though our Company has successfully tapped into this segment with the help of fashionable product line and price tag, but we work among stiff competition. While this remains one of the future prospects of the Company, till the same is realized, the e-commerce players having a wider market outreach pose a competition to the Company.

RAW MATERIALS

The main raw material for our operations are (i) fabric (ii) Accessories which includes threads, buttons, elastic, label, tag, zipper and (iii) accessories. The Company currently sources its raw fabric from the local markets of Kolkata, Surat and Mumbai. Other material required for our operation are accessories and packing materials. Items of property, plant and equipment are measured at cost, less accumulated depreciation and accumulated impairment losses.

The cost of an item of property, plant and equipment comprises: (a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; (b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; (c) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other cost directly attributable to bringing the item to working condition for its intended use.

The cost of improvements to leasehold premises, if recognition criteria are met, are capitalized and disclosed separately under leasehold improvement.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal and retirement of an item of property, plant and equipment is determined as the difference between the sale proceeds and the carrying amount of the asset is recognized in Statement of profit and loss.

W.D.V of Partnership Firm (Forcas Apparels) which is converted in Pvt. Limited Company viz. Forcas Studio Pvt Ltd has been carried Forward as Gross Carrying Amount in Schedule Plant, Property & Equipment and accordingly depreciation has been charged on W.D.V. method.

Subsequent cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with expenditure will flow to the Company and the cost of the item can be measured reliably. All other subsequent cost are charged to Statement of profit and loss at the time of incurrence.

Depreciation

Depreciation on PPE is provided on Written down value method computed on the basis of WDV rate prescribed in Schedule II to the Companies Act, 2013 ('Schedule II') on a pro-rata basis from the date the asset is ready to put to use.

E. INVENTORIES

Inventories of finished goods are valued at cost or net realizable value ("NRV"), whichever is lower. Costs of inventories has been determined using weighted average cost method and comprise all costs of purchase after deducting non-refundable rebates and discounts and all other costs incurred in bringing the inventories to their present location and condition. Provision is made for items which are not likely to be consumed and other anticipated losses wherever considered necessary. The comparison of cost and NRV for traded goods is made on at item Company level basis at each reporting date. However, there is no inventory of any products.

F. BORROWING COSTS

Borrowing costs attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are recognized as an expense in the period in which they are incurred. Capitalization of borrowing costs is suspended during the extended period in which active development is interrupted. Capitalization of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. Other borrowing costs are charged to statement of profit and loss as and when incurred.

G. IMPAIRMENT OF ASSETS

At each reporting date, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication of impairment. If any such indication of impairment exists, then the asset's recoverable amount is estimated. For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash generating units ('CGU').

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its estimated recoverable amount.

Impairment losses are recognized in the Statement of profit and loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU and then to reduce the carrying amounts of the other assets in the CGU on a pro-rata basis.

For other assets, an impairment loss is reversed only if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

H. PROVISIONS AND CONTINGENT LIABILITIES AND ASSETS

Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent liabilities

Contingent liabilities are possible obligations that arise from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote.

I. EMPLOYEE BENEFITS

Employee benefit liabilities such as salaries, wages and bonus, etc. that are expected to be settled wholly within twelve months after the end of the reporting period in which the employees render the related service are recognized in respect of employee's services up to the end of the reporting period and are measured at an undiscounted amount expected to be paid when the liabilities are settled. Gratuity has been calculated based on the report of actuary.

The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any relating to income taxes. It is measured using tax rates enacted for the relevant reporting period. 29 Disclosure pursuant to Accounting Standard - 15 'Employee Benefits' as notified u/s 133 of the Companies Act, 2013

29.1 Defined Benefit Plan: The following are the types of defined benefit plans:

a Gratuity Plan

15 days salary for every completed year of service. Vesting period is 5 years and payment is restricted to Rs. 20 lacs. The present value of defined obligation and related current cost are measured using the Projected Credit Method with actuarial valuation being carried out at each balance sheet date.

b Risk Exposure

Through its defined benefit plans, the company is exposed to a number of risks, the most significant of which are detailed below:

Interest Rates Risk	The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase. Thus the plan exposes the Company to the risk of fall in interest rates. Some times, the fall can be permanent, due to a paradigm shift in interest rate scenarios because of economic or fiscal reasons. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability (as shown in financial statements). Even for funded schemes, a paradigm downward shift in bond yields may affect the reinvestment yields and may increase ultimate costs.
Salary Inflation Risk	The present value of the defined benefit plan is calculated with the assumption of salary escalation rate(SER), which is applied to find the salary of plan participants in future, at the time of separation Higher than expected increases in salary will increase the defined benefit obligation and will have an exponential effect.
Demographic Risk	Demographic assumptions are required to assess the timing and probability of a payment taking place. This is the risk of volatility of results due to unexpected nature of decrements that include mortality, attrition, disability and retirement. The effects of this decrement on the DBO depend upon the combination salary increase, discount rate, and vesting criteria and therefore not very straight forward. It is important not to overstate withdrawal rate because the cost of retirement benefit of a short serving employees will be less compared to long service employees.
Actuarial Risk	It is the risk that benefits will cost more than expected. This can arise due to one of the following reasons: Adverse Salary Growth Experience: Salary hikes that are higher than the assumed salary escalation will result into an increase in Obligation at a rate that is higher than expected. Variability in mortality rates: If actual mortality rates are higher than assumed mortality rate assumption than the Gratuity benefits will be paid earlier than expected. Since there is no condition of vesting on the death benefit, the acceleration of cash flow will lead to an actuarial loss or gain depending on the relative values of the assumed salary growth and discount rate. Variability in withdrawal rates: If actual withdrawal rates are higher than assumed withdrawal rate assumption than the Gratuity benefits will be paid earlier than expected. The impact of this will depend on whether the benefits are vested as at the resignation date.
Liquidity Risk	Employees with high salaries and long durations or those higher in hierarchy, accumulate significant level of benefits. If some of such employees resign / retire from the company there can be strain on the cash flows.
Asset Liability Mismatch:	This will come into play unless the funds are invested with a term of the assets replicating the term of the liability
Investment Risk:	For funded plans that rely on insurers for managing the assets, the value of assets certified by the insurer may not be the fair value of instruments backing the liability. In such cases, the present value of the assets is independent of the future discount rate. This can result in wide fluctuations in the net liability or the funded status if there are significant changes in the discount rate during the inter-valuation period.
Market Risk:	Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits & vice versa. This assumption depends on the yields on the corporate / government bonds and hence the valuation of liability is exposed to fluctuations in the yields as at the valuation date.
Legislative Risk/Regulatory Risk:	Legislative risk is the risk of increase in the plan liabilities or reduction in the plan assets due to change in the legislation / regulation. The government may amend the Payment of Gratuity Act thus requiring the companies to pay higher benefits to the employees. This will directly affect the present value of the Defined Benefit Obligation. The new labour code is a case in point. And the same will have to be recognized immediately in the year when any such amendment is effective.

h Sensitivity Analysis

The sensitivity analyses below have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period. Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:

Particulars	Gratuity (29.2.2024)		
	% Increase in Defined Benefit Obligation	Liability	Increase / Decrease in Defined Benefit Obligations
Effect on DBO due to 1% increase in Discount Rate	- 10.31	280375.00	(32,244.00)
Effect on DBO due to 1% decrease in Discount Rate	12.16	350629.00	38,009.00
Effect on DBO due to 1% increase in Salary Escalation Rate	11.88	349760.00	37,141.00
Effect on DBO due to 1% decrease in Salary Escalation Rate	- 10.25	280571.00	(32,048.00)
Effect on DBO due to 1% increase in Attrition Rate	- 3.94	300300.00	(12,319.00)
Effect on DBO due to 1% decrease in Attrition Rate	4.14	325549.00	12,930.00
Mortality rate 10% Up	- 0.01	312593.00	(26.00)

While one of the parameters mentioned above is changed by 100 basis points, Other parameters are kept unchanged for evaluating the DBO While there is no change in the method used for sensitivity analysis from previous period, the change in assumptions now considered are with reference to the current assumptions Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our business is subjected to various risks and uncertainties, including those discussed in the section titled “*Risk Factor*” beginning on page 26 of this Red Herring Prospectus. Our results of operations and financial conditions are affected by numerous factors including the following:

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to upto three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure

to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

- c) Phase III/T+3: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023 vide T+3 Press Release. In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Press Release as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue, it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
